## Option II Classes

**Maximum 15 students per class**

Teachers will provide extra help after class in small groups twice per week.

### **Mathematics**

#### **Honors Algebra I**

Students study the real number system, practice solving equations and inequalities, and learn polynomials and exponents.

**Textbook:** Prentice Hall Mathematics: Algebra 1, ISBN: 0131339966

#### **Honors Advanced Algebra II**

Students study advanced algebraic concepts and functions, both exponential and logarithmic. They also learn non-linear equations, conics, matrices and determinants.

**Textbook:** Big Ideas Math Algebra 2, Ron Larson and Laurie Boswell, ISBN: 9781608408405

#### **Honors Geometry**

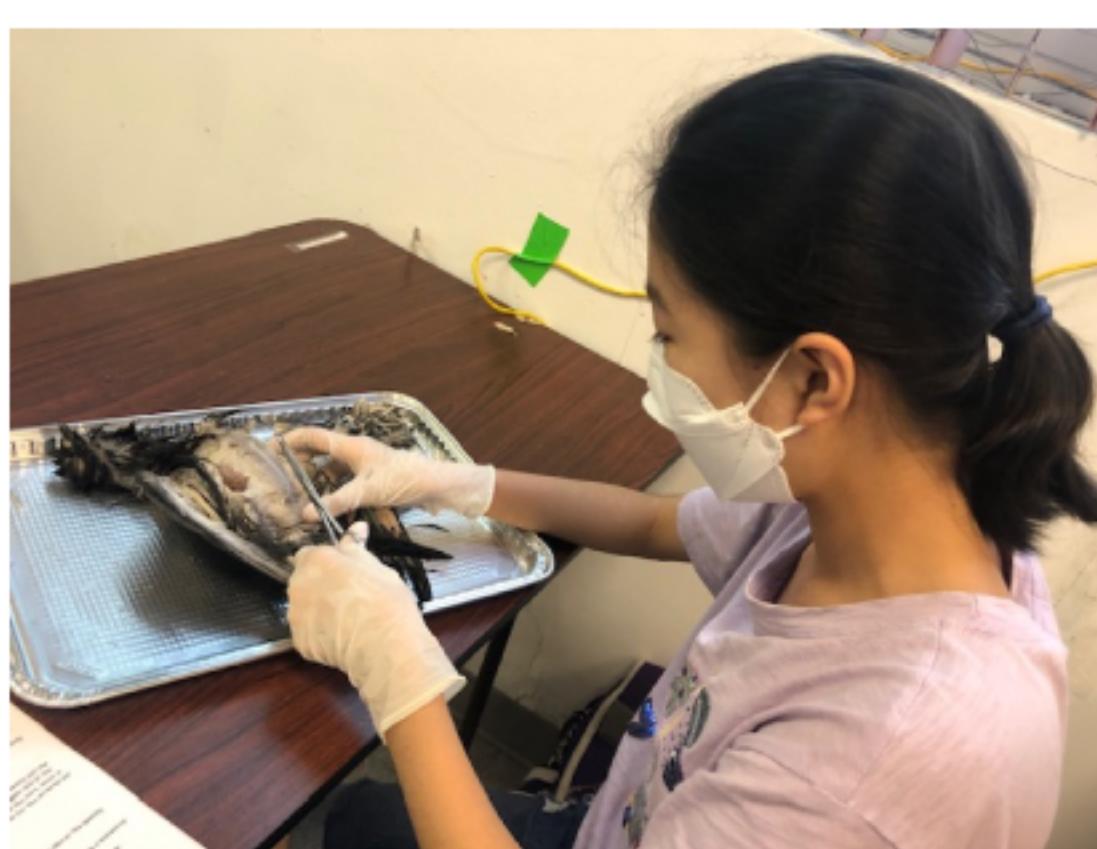

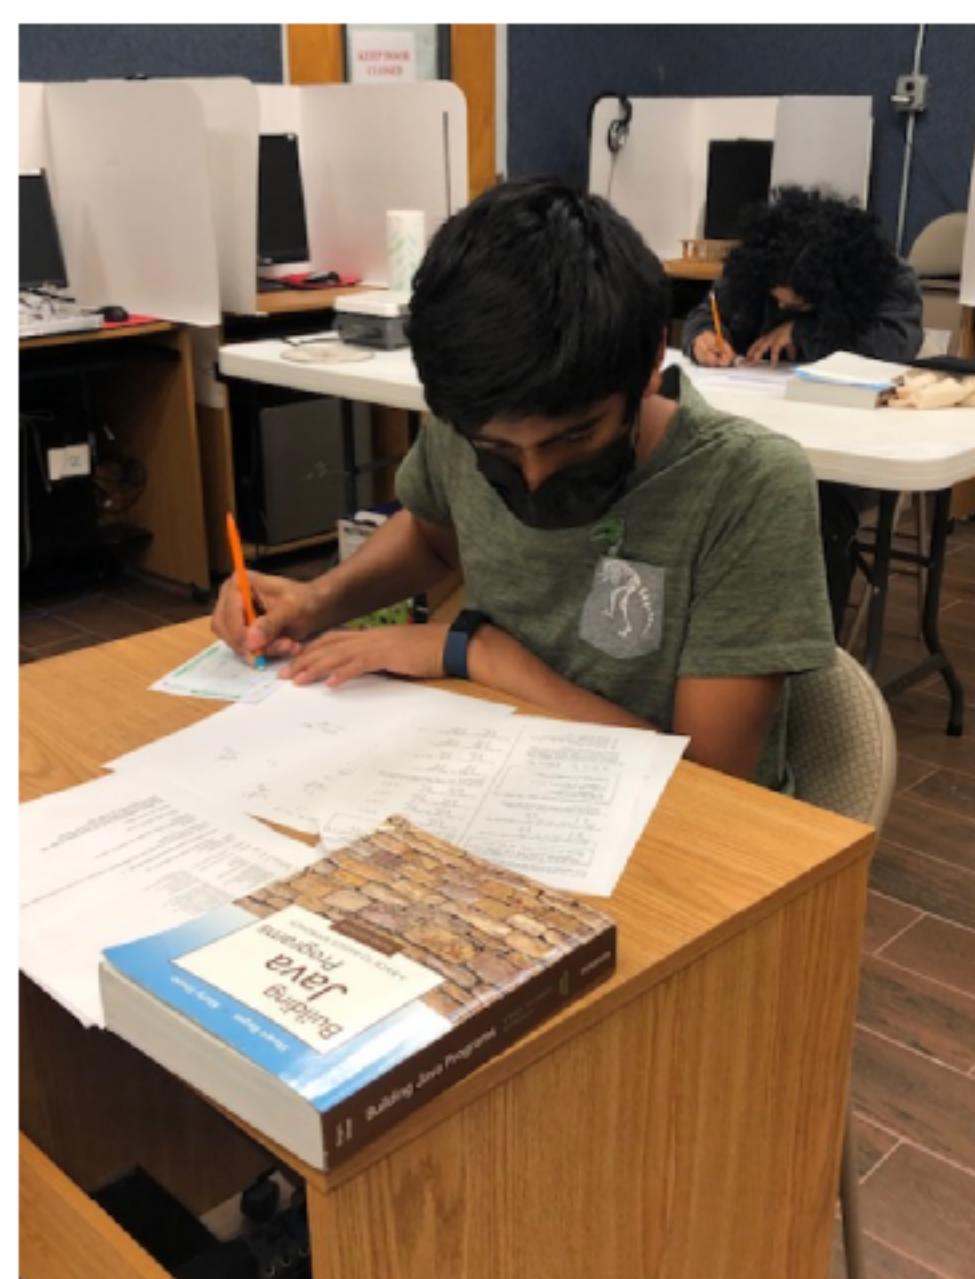

Students learn the logical thought process required for developing geometric proofs and drawing appropriate conclusions. They examine concepts of congruence, similarity, and transformation as well as angle and line relationships.

**Textbook:** Geometry, McDougal Littell, ISBN: 0866099654; Houghton Mifflin, ISBN: 0544385810

#### **Honors Pre-Calculus**

Students study trigonometry, inverse functions, selected analytic geometry, probability, and basic concepts of differential and integral functions.

**Textbook:** Precalculus with Limits, Larson/Hostetler, ISBN: 9780547219929 Advanced Mathematics; Precalculus with Discrete Mathematics and Data Analysis,

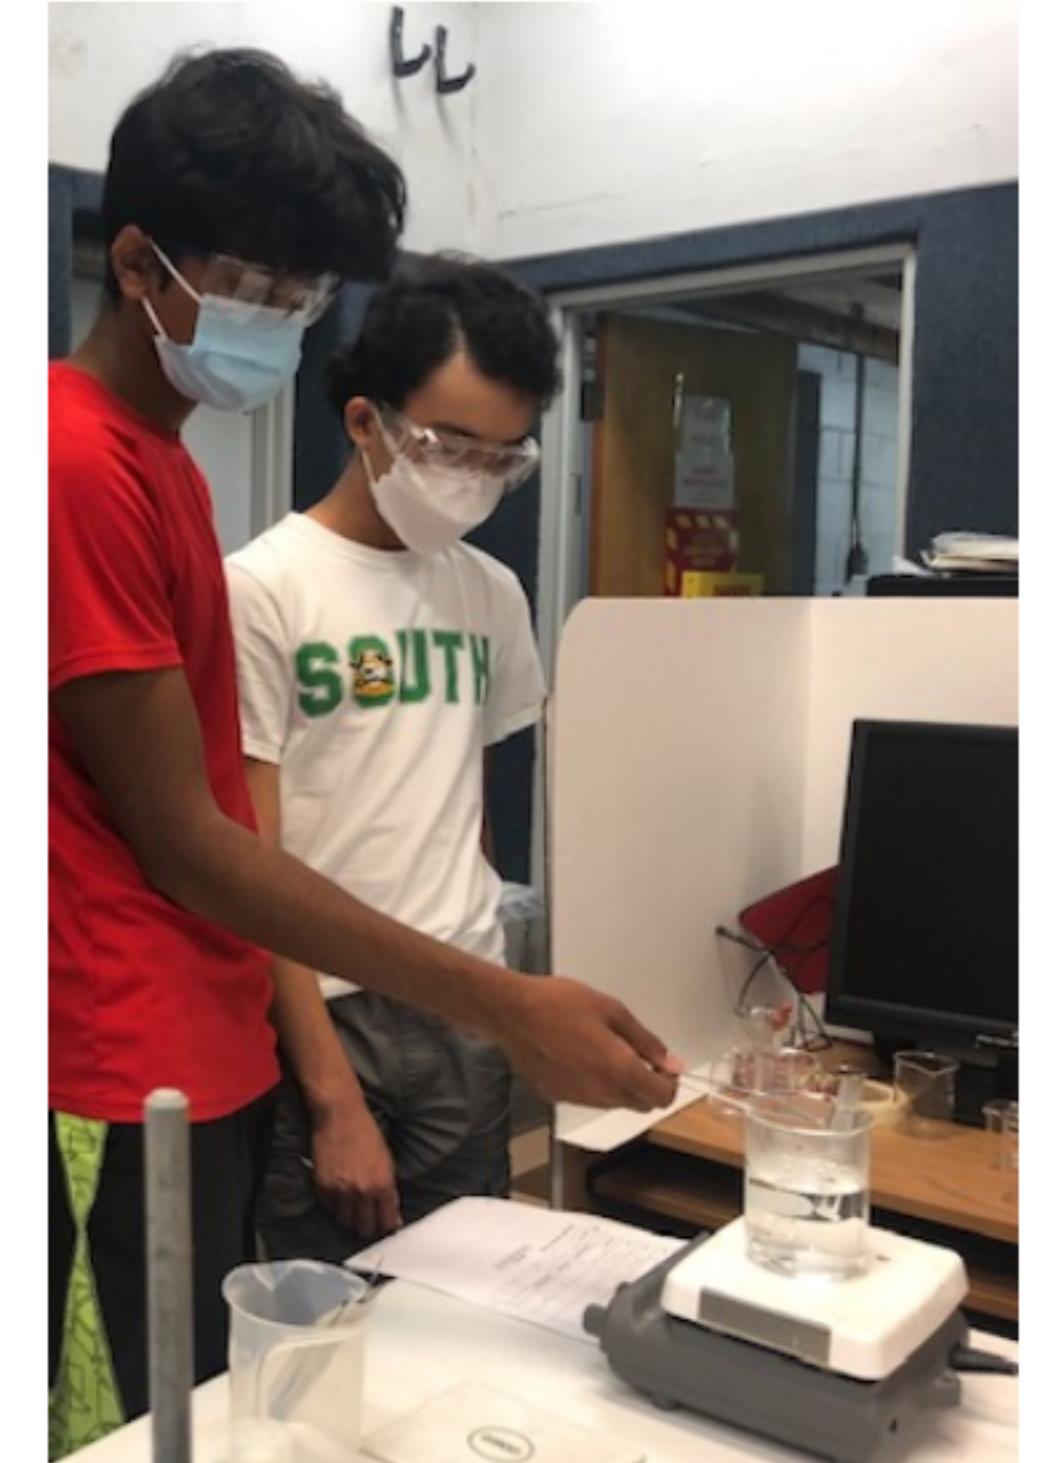

### **Science**

#### **Honors Biology**

Students focus on the structure and function of a cell, sources of energy, genetics, evolution, and fundamental life processes.

**Textbook:** Biology Concepts and Applications by Cecie Starr, ISBN: 0-534-46223-5

#### **Honors Chemistry**

Students study the qualities of matter, the behavior of electrons and waves, chemical bonding and reactions. There will be hands-on lab activities.

**Textbook:** Chemistry by Prentice Hall, ISBN: 0-13-115262-9

#### **Honors Physics**

Students study one and two dimensional motion, dynamics, work and energy, momentum, electric forces and fields, gravity, electromagnetism, and optics.

**Textbook:** Physics by Holt, ISBN: 978-0321592774

### **Computer Science**

#### **Introduction to Computer Science with Java**

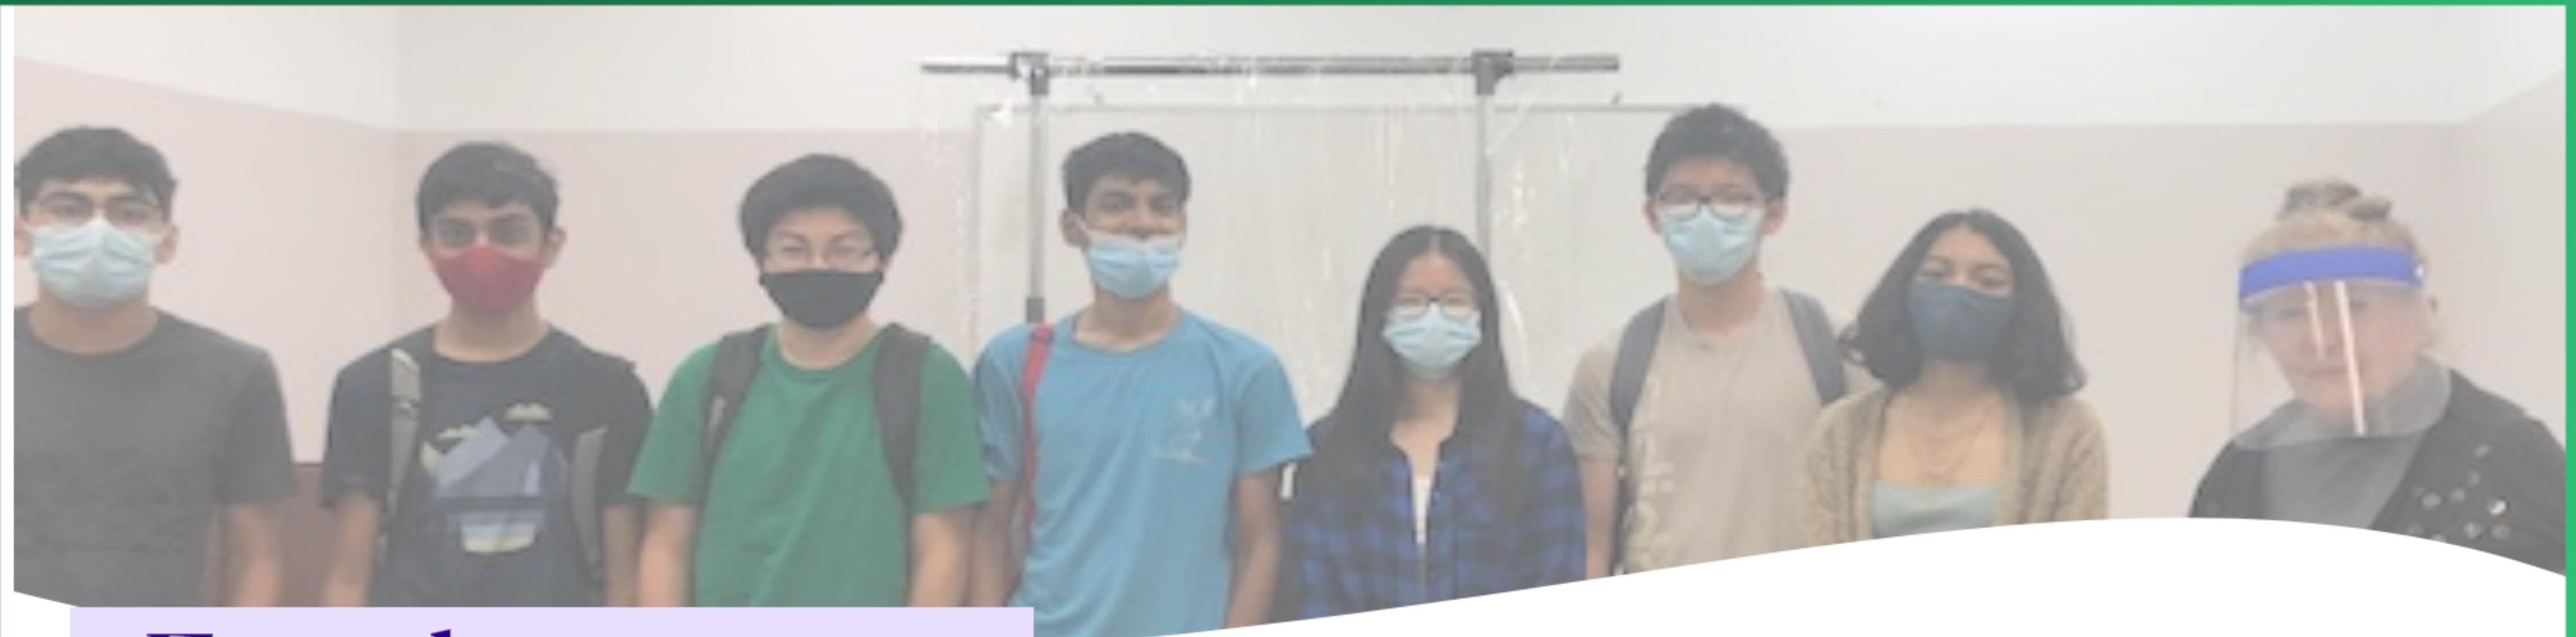

Students will learn the basics of computer science. The course is designed to introduce students to the foundational concepts of the fields of computing and technology, and how these fields can impact the world.

**Textbook:** Starting Out With Java: Early Objects, by Tony Gaddis, Chapters 1-7

#### **AP Computer Science A**

This course aligns with the College Board AP Computer Science A curriculum covering topics usually included in a college-level computer science course.

**Textbook:** Building Java Programs: A Back to Basics Approach, By Stuart Regis and Marty Steep

# Enrichment

## English

### **Reading, Vocabulary and Literature**

Students apply deduction skills and strategies to analyze short stories. Fundamentals of language arts – listening, speaking, reading, and writing – are stressed. Students strengthen their vocabulary, grammar, and reading abilities.

**Textbook:** Sadlier-Oxford, Online Sources

Grades: **A 4-5 C 7-8**  
**B 6-7 D 8-9**

### **Grammar and Composition**

Emphasis is put on grammar, short essays, and creative writing. Students read novels and short stories to strengthen reading comprehension and vocabulary.

**Textbook:** Vocabulary Workshop by Sadlier-Oxford Grammar and Composition – Writer's Choice by Glencoe

Grades: **A 4-5 C 7-8**  
**B 6-7 D 8-9**

## Mathematics

### **Preview in Pre-Algebra, Algebra I or II**

This class will allow students to “preview” the math class that they will be taking next year: either Pre-Algebra or Algebra I/II. They will be introduced to math concepts and will be given a background for accelerated math learning.

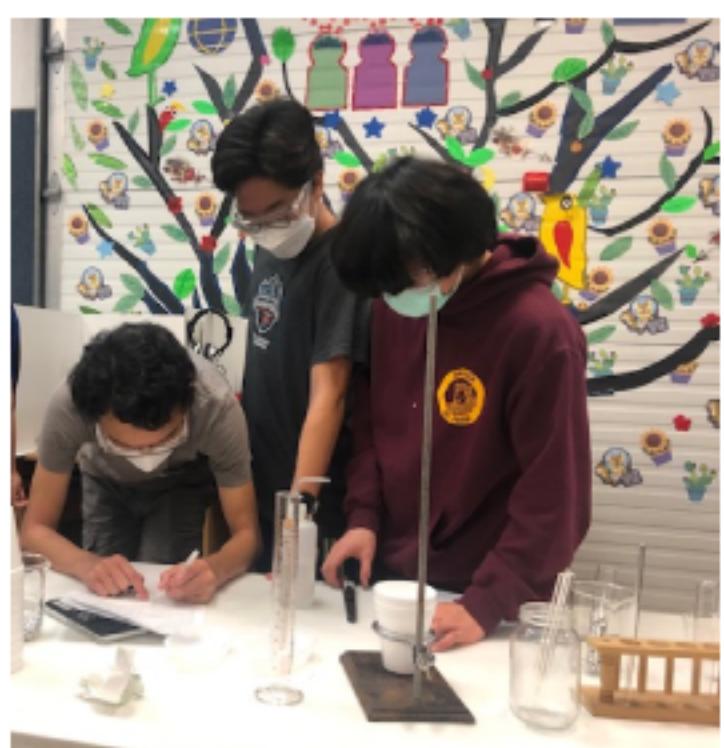

Grades: **B 6-7**  
**C 7-8 D 9+**

## Science

### **Introduction to High School Biology**

Students preview biology by learning core scientific principles, theories, and processes governing living organisms, biological systems, and natural phenomena. This will give them a background for accelerated learning.

**Textbook:** Cecie Starr, Thompson

## **Maximum 10 students per class**

### **AP Statistics Preview**

Students get a preview of the AP Statistics curriculum. This course introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students will learn how to use data and sampling, learn patterns, and make statistical inferences.

**Textbook:** The Practice of Statistics, ISBN: 1464108730

### **STEM+ \*call us about additional options**

### **STEM focused Science + Tech**

The basics of biology, chemistry, physics, engineering and related fields are covered. Students learn fundamental concepts for a deeper understanding of how science is present in everyday life. Foundations of scientific theory is explored through lectures, labs, and demonstrations. Students also learn the applications of robotics, technology, and engineering by building robots.

**Textbook:** Prentice Hall

### **Introduction to Python + Math**

Students will learn the basics of Python language programming. Topics include data types, variables, arithmetic and Boolean expressions, control structures, functions, lists, etc. Once students grasp these building blocks, they will be introduced to the pyGame package that allows for programmers to more easily build video games in Python. By the end of the course, students will be able to write stand-alone Python programs.

### **STEM + Creative Writing & Math**

### **SAT/ACT**

### **SSAT/ISEE**

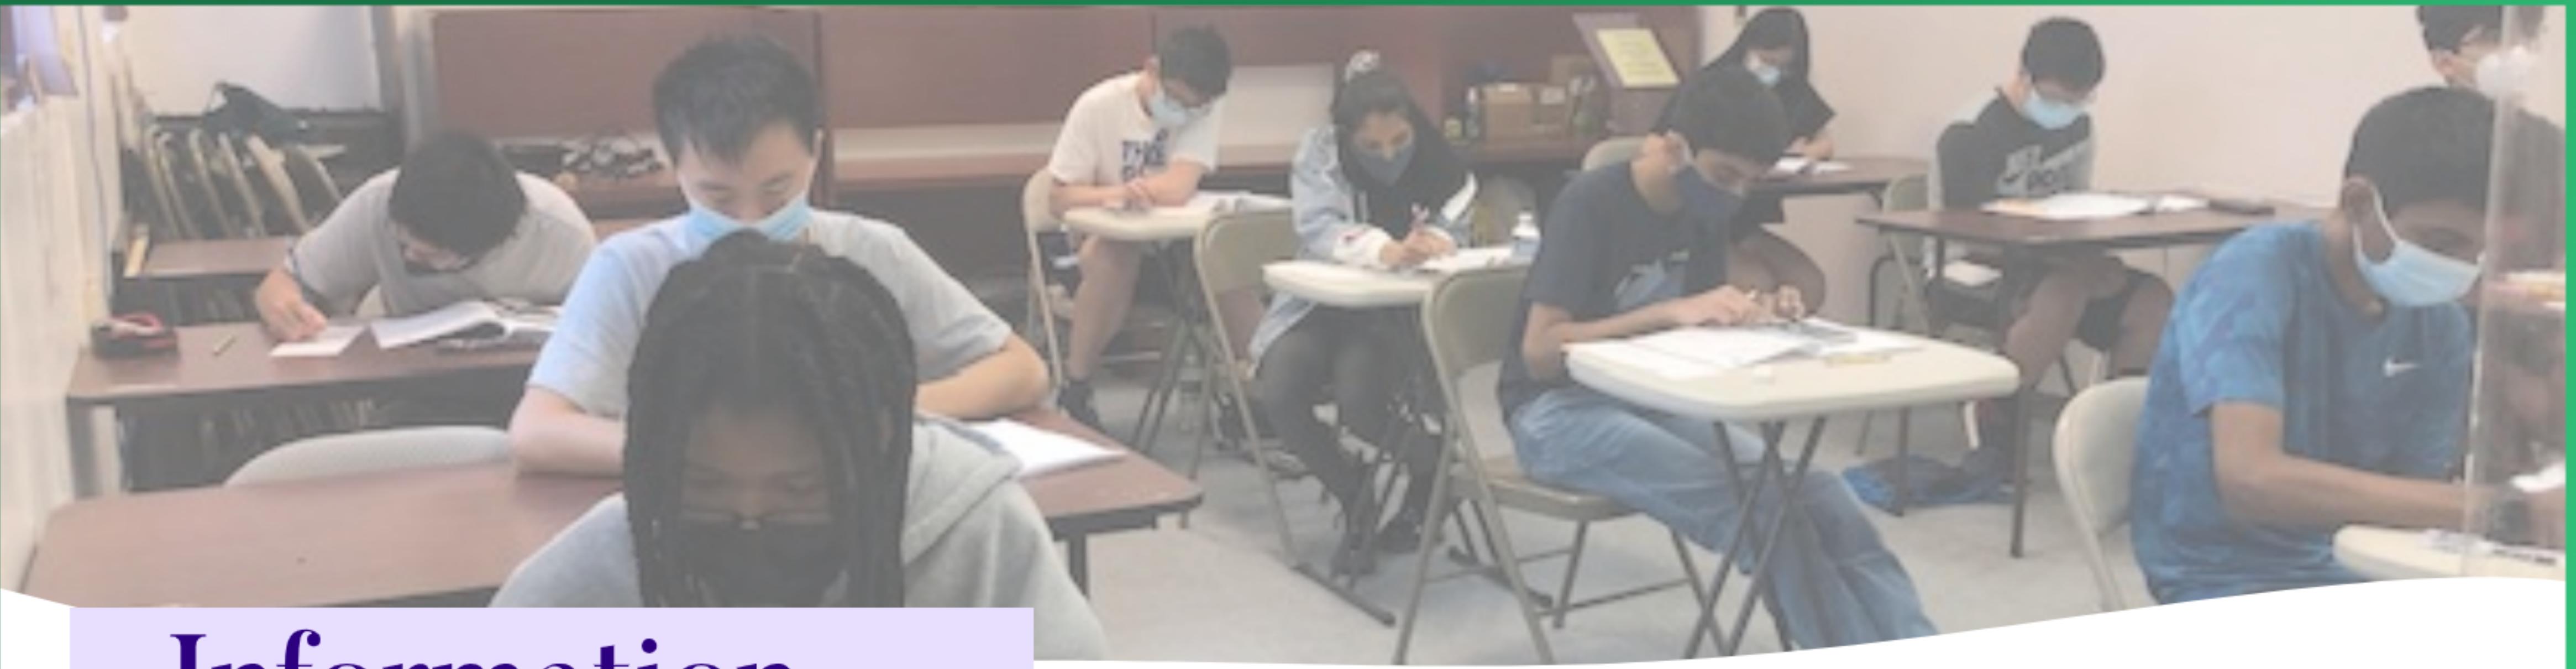

Students will learn the format of the SSAT and ISEE, review the verbal and math skills required for each test, and check their progress with practice tests.

**Textbook:** McGraw-Hill's SSAT/ISEE

### **SAT/PSAT/ACT**

Students will review the verbal and math skills needed for the test.

**Textbook:** College Board, Barron's, Princeton Review

# Information

## Quakerbridge's Mission

We design summer courses to foster academic excellence. Consequently, our students are expected to spend a significant amount of time and energy to accomplish their goals. Our academic program offers an extensive curriculum to prepare students for success in an Honors or AP Level course during the school year.

Each program provides up to one hour of daily homework and weekly assessments on Fridays. Instructors review and grade all assignments, as well as provide biweekly report cards to parents. Parents are notified of activities and assignments throughout the summer program.

Our instructors are extremely well qualified; many of them have advanced degrees, extensive teaching experience, and recognition for their excellence in the classroom. Some are even award-winning teachers.

**How do we differ from our competitors?** In addition to our selected instructors, we have small class size from five to fourteen students. This allows instructors to individually address students' needs. Second, we provide all textbooks and materials at no extra cost. Third, we help arrange transportation carpooling services. At Quakerbridge, we are dedicated to providing an enriching and enjoyable learning experience for students, as well as convenience for parents.

## Our Teachers

We have the finest award-winning teachers and professors from top school districts, including:

- Princeton and Princeton Charter
- Montgomery
- West Windsor – Plainsboro
- Lawrenceville

## Our Features

- Low student to teacher ratio (five to fourteen students)
- Same course materials and textbooks as used in local school districts' honors courses
- Mathematics/science credit courses available through Option II
- Private tutoring in all courses for 5th grade or higher
- Frequent homework, exams, and progress reports
- Quakerbridge is an accredited member of the Middle States Association Commissions on Elementary and Secondary Schools (MSA-CESS)
- Quakerbridge has also been a certified ETS testing center since 2006.

Please go to our website:  
[www.quaker-bridge.org](http://www.quaker-bridge.org)

to view our summer program video and  
for further information.

## Transportation

We manage a carpool network service that provides the matching of families who may share rides together.
